

Asad Waqas

Flutter Developer | BS Computer Science | Lahore, Pakistan

 +92 302 8207226  asadwaqas.dev@gmail.com  [Portfolio](#) | [GitHub](#)

Professional Summary

Results-driven Full-Stack Mobile Developer with professional experience building production-level cross-platform applications using Flutter and Dart. Adept at designing clean UI architectures, integrating Firebase services, and utilizing state management solutions like Provide, GetX and Bloc. Backed by practical knowledge of server-side architectures in Django and Python, with a proven track record of collaborating in Agile teams to deploy scalable, high-performance applications.

Technical Skills

- Programming Languages: Dart, Python, JavaScript, SQL
- Mobile Development: Flutter, State Management (GetX, Provider, Bloc)
- Backend & Frameworks: Django, Django REST Framework (DRF)
- Databases & Cloud: Firebase (Authentication, Firestore, Storage), SQLite
- Version Control & Tools: Git, GitHub, RESTful APIs, Agile Methodologies

Work Experience

Xrossapps | Lahore, Pakistan *Flutter App Developer* | Dec 2024 – Present

- Developing and maintaining production-level cross-platform mobile applications using Flutter, ensuring clean UI architecture and efficient backend integration.
- Implementing Firebase services (Authentication, Firestore, Storage) to build seamless, scalable, and secure application functionalities.

Innovage.io | Lahore, Pakistan *Flutter App Developer Intern* | June 2024 – Nov 2024

- Built and deployed cross-platform mobile applications using Flutter, integrating Firebase Authentication and Firestore for real-time data handling.
- Utilized GetX for state management, significantly optimizing application responsiveness and overall performance.

Selected Projects

FieldFlow | Cross-Platform Management System

- Tech Stack: Flutter, Django DRF, Python, REST APIs
- Architected and deployed a comprehensive employee and customer management solution across mobile and web platforms.

GloryGlobal | Fleet Management Platform

- Tech Stack: Flutter, Dart, GPS Integration
- Engineered a dual-interface fleet management system with customized application panels for both drivers and administrators.

Whisper Guard | AI-Powered Chat Application

- Tech Stack: Flutter, Python, Machine Learning Models
- Built a low-latency, real-time messaging application focusing on user safety and secure communication protocols.

Tailor Management System | Localized B2B Dashboard

- Tech Stack: Flutter, SQLite, Localization Tools
- Developed a localized business management tool supporting both English and Urdu, implementing seamless offline-to-online data synchronization.

Aspire | Institutional Finance Manager

- Tech Stack: Flutter, Cloud Synchronization, SQL
- Created a secure financial tracking application tailored for college administration, ensuring accurate ledger management.

My Life | Productivity & Finance Suite

- Tech Stack: Flutter, CRUD Operations, Firebase
- Developed an all-in-one personal management utility, centralizing daily journaling, expense tracking, and project management.

Cropcare | Agricultural Diagnostic Tool

- Tech Stack: Flutter, Image Processing APIs
- Application allowing users to identify crop diseases through integrated image detection models.

EDUCATION

- **BS Computer Science (Honors)**
University of Education, Lahore (*May 2025*)
- **FSc Pre-Engineering**
Govt. City Science College, Khudian Khas, Kasur (*Nov 2021*)
- **Matriculation (Science)**
Sadiq Memorial School, Khudian Khas, Kasur (*Nov 2019*)
