Lahore, Pakistan | +92 302 8207226 | asadwaqas.dev@gmail.com
Portfolio: https://asadwaqas.online/ | GitHub: https://github.com/asadwaqas-dev21

PROFESSIONAL SUMMARY

Full-Stack Mobile App Developer and Frontend Web Developer with 2+ years of experience delivering Android, iOS, and web applications. Skilled in Flutter, Dart, Next.js, Firebase, Supabase, and PostgreSQL, with basic working knowledge of Python, Django, and Django REST Framework. Experienced in REST API integration, Google Play Console releases, deployments on Vercel, Netlify, and Render, custom domain configuration, debugging, and Git-based collaboration.

TECHNICAL SKILLS

Languages: Dart, JavaScript, Python, Java, SQL
Mobile: Flutter, Android, iOS, GetX, Provider, Bloc
Frontend Web: Next.js, React.js, Responsive Web Design, Reusable Components
Backend and Cloud: Firebase, Supabase, Django (basic), Django REST Framework (basic), REST APIs
Databases: PostgreSQL, Cloud Firestore, SQLite
Deployment and Tools: Google Play Console, Vercel, Netlify, Render, Git, GitHub, Postman, Custom Domains

PROFESSIONAL EXPERIENCE

GrowWithNextify | Full-Stack Mobile App Developer & Frontend Web Developer | Jun 2026 - Present

- Deliver features across 3 platforms: Android, iOS, and web, using Flutter, Dart, and Next.js.
- Integrate Supabase, PostgreSQL, and Firebase for authentication, CRUD workflows, storage, and real-time data.
- Connect REST APIs and third-party services, implement role-based access, and test endpoints with Postman.
- Publish Android releases through Google Play Console and manage deployments on Vercel, Netlify, and Render, including environment variables and custom domains.

Xrossapps | Flutter App Developer | Lahore, Pakistan | Dec 2024 - Present

- Develop and maintain 5+ production-level Flutter applications for Android and iOS.
- Integrate Firebase Authentication, Cloud Firestore, and Firebase Storage for sign-in, real-time data, and media uploads.
- Connect mobile applications with REST APIs and apply GetX, Provider, or Bloc state management based on project needs.
- Support testing, debugging, production builds, and release preparation, contributing to a 20% reduction in deployment time.

Innovage.io | Flutter App Developer Intern | Lahore, Pakistan | Jun 2024 - Nov 2024

- Built Android features with Flutter and Dart during a 6-month development internship.
- Implemented Firebase Authentication and Cloud Firestore for secure access and real-time data handling.
- Used GetX for state management and resolved user interface and functional defects through testing and debugging.

SELECTED PROJECTS

FieldFlow | Flutter, Python, Django REST Framework, REST APIs

- Built employee and customer management workflows, implemented CRUD operations, and resolved mobile-to-backend integration issues.

GloryGlobal | Flutter, Dart, GPS Integration

- Created separate driver and administrator interfaces and integrated GPS-based fleet and location features.

Tailor Management System | Flutter, SQLite, Localization

- Delivered an English and Urdu business application with offline synchronization for low-connectivity environments.

EDUCATION

Bachelor of Science in Computer Science (Honors) | University of Education, Lahore | 2025
